

Gwich'in Renewable Resources Board Wildlife Studies Fund

PROJECT SUBMISSION GUIDELINES

For projects taking place between
April 1st and March 31st of the following year

1 General Information

The Gwich'in Renewable Resources Board (GRRB) is a co-management board established under the Gwich'in Comprehensive Land Claim Agreement. The GRRB is the main instrument of wildlife, fish, and forest management in the Gwich'in Settlement Area (GSA). One of the GRRB's functions is to coordinate the management of renewable resources in the GSA. Through the **Wildlife Studies Fund**, the GRRB provides financial support to projects that contribute to the management of renewable resources in the GSA. Support may be extended to Gwich'in organizations, government agencies, universities, and other research or management organizations. The GRRB also provides in-kind support (e.g., office space, administrative support, logistical support, staff, vehicles, and equipment). The GRRB supports projects that focus on renewable resources in the GSA, particularly those that address GRRB priorities. Priority funding will be given to projects that involve communities, youth, and have substantial co-funding from other partners.

2 Application Procedure

We recommend that you visit the community/communities that is/are affected by your project. Gwich'in beneficiaries can provide you with information that will improve your work. Applicants seeking funds from the GRRB are required to submit a completed application form (**GRRB Wildlife Studies Fund – Application For Funding**) to the affected Renewable Resources Councils (RRCs) for their approval before submitting it to the GRRB (Figure 1). Provide your application to the RRCs well in advance as they meet only once per month. Contact information for all RRCs and the GRRB is listed below. Applications should completely describe the proposed research using non-technical language. Feel free to contact GRRB staff for assistance in the planning of renewable resources projects or in the completion of this application. Project applications must be received by the GRRB by **January 10, 2018 at 1:00PM MST**. Proof of RRC approval must be submitted to the GRRB before funds are dispensed.

3 Approvals, Permits, and Licenses

In addition to community consultation and approval, researchers require permits and licences from several agencies/organizations. Applicants are responsible for ensuring that they have obtained all of the required permits, licences, and approvals. Some of the permits and licences that researchers should be aware of are:

ALL RESEARCH

Gwich'in Land Access

If you plan to work on Gwich'in Private Land, you must obtain a *Gwich'in Land Access Permit*. If you work on Crown Land in the GSA you do not need a *Gwich'in Land Access Permit*. Contact the Gwich'in Land Administration (at the Gwich'in Tribal Council) for more information.

NWT Scientific Research License

The *NWT Scientists Act* requires that all research in the NWT must be licensed. The Aurora Research Institute (ARI) is responsible for issuing these licenses in the Western NWT (see *Doing Research in the Northwest Territories - A Guide for Researchers* <http://www.nwtresearch.com>). Contact the ARI for more information about the *Scientific Research Licence*.

WILDLIFE RESEARCH

Wildlife Research Permit

To conduct research on land animals or wildlife habitat, you must have a *Wildlife Research Permit*. Permit requests are made to the Department of Environment and Natural Resources (ENR, formerly RWED). Letters of community (RRC) and co-management board support for the project are necessary to receive this permit.

FISHERIES RESEARCH

DFO Animal Use Protocol AND Scientific License

If your research involves finfish, shellfish, crustaceans, marine animals, or their eggs, spawn, spat, or juvenile stages, you may be required to complete an *Animal Use Protocol* and apply for a *License for Scientific Research*. For more information, contact the Department of Fisheries and Oceans Canada.

TRADITIONAL KNOWLEDGE RESEARCH

All research that involves interviews (e.g., traditional knowledge studies) or work on social and cultural aspects requires an ethics review. An ethics review, conducted by the Gwich'in Department of Culture and Heritage is required to obtain an ARI licence. When submitting a proposal for an ethics review, researchers should include the questionnaires and consent form that they plan to use. The Gwich'in Tribal Council has produced a *Traditional Knowledge Policy* (2004) that has some excellent guidelines for these forms and more general guidelines for TK. Contact the GTC, or GRRB for a copy.

4 GRRB Approval

4.1 The GRRB will review research applications during the winter Board meeting, which usually takes place in February. Projects that meet the GRRB mandate are additionally evaluated against the following criteria:

- Engagement: The degree to which the researcher engages GRRB and communities affected by the proposed research and activities.
- GRRB Research Priorities: represent the immediate research needs of the Board and are directly linked to the GRRB mandate.

- GSA Research Interests: Represents community interests that may relate to the GRRB mandate, but not necessarily.
 - The GRRB research Interests and Research Priorities may be found on-line: http://grrb.nt.ca/public_registry_research.htm
- 4.2 Applicants should plan on presenting their proposed projects to the Board during this meeting (an in-person presentation is strongly encouraged).
 - 4.3 Applications that have not yet been approved by the RRC may be submitted to the GRRB for consideration, and may be conditionally approved for funding, pending RRC approval.
 - 4.4 Applications that have been rejected by the RRCs may still be submitted to the GRRB for consideration.
 - 4.5 Applicants will be advised of the status of their funding request by the end of February.

5 Community Consultation and Involvement

- 5.1 It is the responsibility of the applicant to ensure that the affected RRCs are fully aware of the project and its implications. Consultations should be conducted via presentations to the affected RRCs so that applicants can answer questions and address concerns raised by the RRCs before the project begins.
- 5.2 Priority will be given to projects that have community involvement, which could include but is not restricted to: gathering concerns and input while planning the project, hiring community members to assist with projects, and using local (preferably Gwich'in-owned) companies for goods or services.
- 5.3 The GRRB strongly encourages the use of **traditional knowledge** when planning and conducting projects. The GRRB and the GTC Department of Culture and Heritage should be contacted when inquiring about TK resources that may be available to use in your research.

6 Youth Involvement_ Youth Work Experience Fund (YWEF)

- 6.1 The GRRB encourages researchers to involve local youth in their projects and offers funding to researchers through the **Youth Work Experience Fund (YWEF)** in order to provide youth with short term (e.g. half day(s), single and/or multi-day) work experience in renewable resources management and on-the-land activities.
- 6.2 Researchers should indicate on the Wildlife Studies Fund **Application For Funding** whether they are willing to hire youth in their research for short-term work experience placements. The YWEF application is Section 3 of the WSF **Application For Funding**. Researchers can follow their own recruitment process or can request the GRRB to connect eligible youth with successful applicants.
- 6.3 If researchers want to apply for YWEF funding only (and not additional WSF research funding), complete sections 1,2, 9 and 11 in addition to section 3.

7 In-Kind Support

- 7.1 Besides financial support through the Wildlife Studies Fund, the GRRB may also provide in-kind support to research and management projects. Examples of in kind support available are: office and storage space, logistics and administrative support, use of equipment and vehicle, and staff support (e.g., technical, field staff). Contact the GRRB for any questions about the details of in-kind support available.

- 7.2 An offer of in-kind support will be laid out in the cover letter accompanying the contribution agreement for project funding. All in-kind support is subject to equipment and staff availability. Final arrangements for in-kind support must be made directly with the staff member responsible and should be made well in advance.

8 Multi-Year Projects

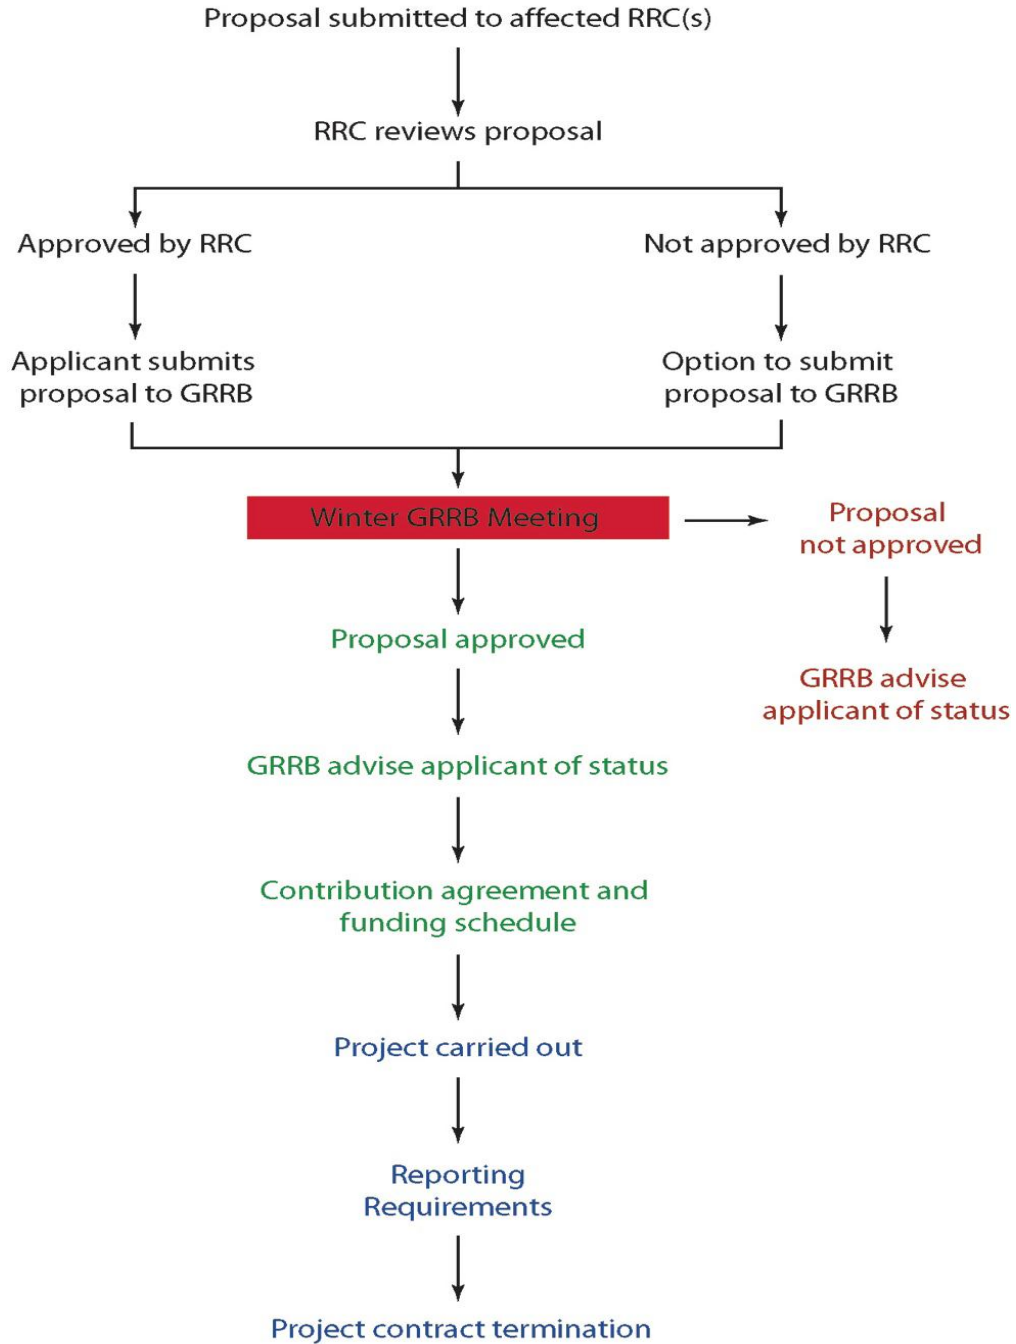

- 8.1 Applicants who are conducting multi-year projects must complete the **Application For Funding** each year. In addition, a project update is required for each year (see Reporting Requirements).
- 8.2 Applicants should keep the RRCs informed of project progress through regular updates.

9 Reporting Requirements

- 9.1 An update for the fall GRRB Board meeting (usually September) is encouraged.
- 9.2 An update for the winter GRRB Board meeting (usually February) is required. This update can be done in person (encouraged) or can be written.
- 9.3 It is the responsibility of the funding recipient to keep informed of meeting dates. Updates must be received 30 days before the Board meeting to ensure adequate time for distribution to board members.
- 9.4 Upon final completion of a GRRB-funded project, the GRRB must be provided with a detailed report of the results. This report may be made public (e.g., held in the GRRB library and/or put on the GRRB website).
- 9.5 Research supported by the GRRB may be published or reported on elsewhere so long as it acknowledges support of the GRRB. A copy of all publications arising (agency reports, theses, posters, publications) shall be provided to the GRRB.
- 9.6 Along with technical reports, researchers are encouraged to prepare non-technical summaries for the affected communities. These can take the form of, for example, non-technical reports, posters, illustrated booklets, or community presentations.

Figure 1. Flow chart outlining the procedure of applying for and obtaining GRRB funding.

Procedures for GRRB Funding Application

Contact Information

Gwich'in Renewable Resources Board

P.O. Box 2240, Inuvik, NT
